

5.33.2 RELEASE NOTES

SUMMARY

Secure Mail Platform (SMP) release v5.33.2 is the newest release of DataMotion's primary application and is the first major release since 5.32 originally released on Nov 6, 2013. This is a drop to fix a variety of problems that came out of the release of 5.33.

KNOWN ISSUES

Items that are labeled known issues are generally issues that are not regressions, and exist currently in production. We are finding more of these issues due to increased test coverage with every release. The goal is to eventually have zero unknown defects.

We assign non-regression issues to the next open iteration.

- 3653 – You can’t upgrade from pre-5.28 version to 5.31
- Redirect Issue
- 3685 – Appearance of “invalid PIN code” during Direct account activation
- 4208 – Unable to change password with forgot password
- 4431 – Rich Text in Chrome
