SQL Server 2014

SQL Server 2016 – **set to Compatibility Level 110** – Current tested Version.

SQL Server 2019

#### Gateway

Gateway 4.18

## NEW FEATURES IN THIS RELEASE

### SQL SERVER 2019 SUPPORT FOR ON-PREMISE CUSTOMERS

This feature is specific to any on-premise customers that would upgrade to this release. It is now possible to upgrade SQL Server to the 2019 version if desired as this SQL Server version is now fully supported as of this release.

### ANNOUNCEMENT BANNER FOR ON-PREMISE CUSTOMERS

This feature is also specific to on-premise customers in that there will now be a set of options for an announcement banner that affects the login page of the web portal. These settings are shown below for reference.

Announcement Banner	
<b>Use announcement banner</b> Uses an announcement banner on the logon page	<input checked="" type="radio"/> Off <input type="radio"/> On
<b>Announcement banner header</b> The announcement banner header	<input type="text" value="&lt;b&gt;IMPORTANT MAINTENANCE NOTICE"/>
<b>Announcement banner text</b> The announcement banner text	<input type="text" value="&lt;b&gt;DataMotion will be performing a system"/>

## CHANGES AND ENHANCEMENTS MADE IN THIS RELEASE

### IMPROVED FILE UPLOAD

This release includes an enhanced file uploader on the DataMotion web portal which is a part of the Compose screen. There is now drag and drop support for files and a progress indicator showing the completion percentage of the uploading files.

### RICH TEXT EDITOR AND SPELLCHECKER IMPROVEMENTS

In this release, User Experience has been significantly improved upon by offering a number of enhancements in the Rich Text Editor and spellchecker utilized in SecureMail Web portal.

### PASSWORD COMPLEXITY

The password complexity will be changed in this release to allow a minimum password length of 12 characters for new passwords.

### PERSONAL OUTLOOK BUTTON

The DataMotion SecureMail Plugin for Microsoft Outlook has been updated to version 5.0.28 in this release.

### TAGGING BUTTON

The Tagging version of the SecureMail Plugin for Microsoft Outlook has been updated to version 2.0.

## RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

**Table 1. Resolved Issues**

Original Issue	Description/Resolution	Notes
Compose screen on Full Site for mobile devices was missing message body	Updates to the text editor have corrected this issue.	Only affected the site when using a mobile device.
Tracking for SafeTLS messages.	For SafeTLS messages the message will now show Delivered securely by SafeTLS instead of Delivered to the internal mail server for easier tracking.	Only affects SafeTLS messages.
Tracking for SafeTLS messages with attachments.	For SafeTLS messages that are delivered to some users over SafeTLS and some users could not receive over tls all delivery status will display Notification message sent. Message not opened.	Only affects SafeTLS messages.
POP3 timestamp issue in certain email clients.	Messages received over POP3 would sometimes show their timestamp as off by 4-5 hours in Microsoft Outlook. This has been fixed.	Only affected POP3 delivery on certain email clients.
Old Outlook plugin versions.	Old versions of the Outlook button which are no longer in support were still available to download. These versions have been removed.	Only applies to Client Downloads in the web portal.

## KNOWN ISSUES

The following are known issues in this release.

**Table 2. Known Issues**

Description
Adding user to Compose page from Address book erases prefilled message contents.
Inline videos on reply emails stay when they shouldn't.
Embedded videos need play button clicked twice.

## DOCUMENTATION

The following documentation is associated with this release:
