NEW FEATURES IN THIS RELEASE

MULTI-FACTOR AUTHENTICATION

This release includes the new multi-factor authentication feature which allows users to receive a one time passcode at their notification email address in order to log into the Direct platform. Using this feature adds an additional layer of security to the logon mechanism of the platform. Please note however that if the notification email is not accessible then it will not be possible to sing into the platform should this feature be enabled.

XDR MDN CONFIGURATION

It is now possible to configure the MDN for XDR related messages upon request to DataMotion support. Configuration options for this include the addressBlock and message Disposition sections of the MDN. This feature has resolved Ticket#10192330.

RESOLVED ISSUES

The following-reported issues have been resolved in this release.

Table 1. Resolved Issues

Description	Resolution	Notes
Preferred Language section of CCD missing from CCDA viewer in web portal.	The viewer in the web portal was updated to ensure that this field appears as expected if it is utilized in the CCD.	The CCDA viewer is only accessible from the messaging portal. Resolves Ticket# 10190164
NPI numbers not being found.	An update to the NPI registry URL was required for using the API to search. This has been completed and the issue resolved.	Resolves Ticket# 10190051

KNOWN ISSUES

The following are known issues in this release.
