## CHANGES AND ENHANCEMENTS MADE IN THIS RELEASE

### PRIVATE IDENTITY PROVIDER LOGIN FOR MOBILE SITE

The private identity provider (Okta) has been added as a login option for the mobile website for those customers who have this form of login enabled.

### ADMIN API ENDPOINTS

The Admin API has been expanded with a new endpoint. These are as follows:

- Company/Create (POST)

Additional information related to the API will be available on the DataMotion developer site https://developers.datamotion.com.

### MESSAGING API FUNCTION GET MESSAGE METADATA IMPROVED

The Secure Messaging API function GetMessageMetadata has been improved to also give the email Subject when returning a response.

### PASSWORD REQUIREMENTS WILL NO LONGER ALLOW USERNAME OR EMAIL

The password requirements will no longer permit users to utilize their usernames or emails as passwords to access their accounts.

## RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

Table 1. Resolved Issues

| Original Issue | Description/Resolution | Notes |
|---|---|---|
| Outlook button not downloading correctly. | The Outlook button was not downloading correctly from the DataMotion web portal. This has been corrected. | Only affected web portal users who have the Outlook button enabled on their accounts. |
| Expired messages not automatically removing. | Expired messages were not being automatically sent to Trash. This has been fixed. | None. |

## KNOWN ISSUES

The following are known issues in this release.

Table 2. Known Issues
