INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.04. This release is a culmination of changes and enhancements as well as bug fixes for the platform. An overview of these enhancements is included in this document as are highlights of various bug fixes.

CHANGES AND ENHANCEMENTS MADE IN THIS RELEASE

ENHANCED PASSWORD AUTO-FILL

The password autofill for iOS devices has been enhanced so that users have additional time to save their password via iOS system prompts.

ENHANCED ANTI-SPAM BEHAVIOR

The system's anti-spam behavior has been enhanced to support the changes made by Google and Yahoo related to bulk senders. Now, if a sender does not have DKIM for their domain, their messages shall be delivered via DataMotion's notification address. Also, should a sender's message be from the yahoo.com or gmail.com domain, their message shall be delivered via DataMotion's notification address. These changes were made in order to reduce the likelihood of messages sent to Google or Yahoo being flagged as spam.

RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this is a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

Table 1. Resolved Issues

Original Issue	Description/Resolution	Notes
Inline images were not appearing correctly in the web portal.	When inline images were included in messages sent from Microsoft Outlook they would not appear correctly in the web portal. This has been corrected and inline messages sent via Outlook will appear without issue when using the web portal interface.	Resolves issue from Ticket# 10224774.
