INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.05. This release is a culmination of resolved issues for the platform. An overview of these resolved issues is included in this document which highlights the resolutions performed.

RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this is a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

Table 1. Resolved Issues

Original Issue	Description/Resolution	Notes
Attempting to send emails would sometimes throw a failed delivery status notice back to the sender.	Emails with certain characters in the display name were causing messages to return failed delivery notices and not be delivered. This has been corrected and messages will now be delivered as expected.	Resolves issue from Ticket#10225273.
The send button on the compose screen lacked visibility.	When composing a message the Send button did not differentiate itself from the rest of the user interface as much as expected. This has been corrected and now the Send button will have a border when composing a message.	Resolves issue from Ticket#10225326.
