INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.06. This release is a culmination of resolved issues for the platform. An overview of these resolved issues is included in this document which highlights the resolutions performed.

RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this is a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

Table 1. Resolved Issues

Original Issue	Description/Resolution	Notes
Read receipts would sometimes have double email addresses.	Changed logic so that user's display name's would not be the same as their email address which was causing this issue. Read receipts should no longer display double going forwards.	Resolves issue from Ticket#10224693.
Sometimes longer names would cause spacing issues in the recipient list.	Certain titles in the display name of recipients would cause spacing issues in the SMC Compose interface. This has been corrected.	Affects the Compose view of the SMC portal.
Sometimes when attempting to use reply all the message's recipients would not load.	The To and Cc fields would sometimes not fully populate the expected recipient list when using the reply all functionality for a message. This has been corrected.	Affects the Compose view of the SMC portal.
