INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.08. This release is a culmination of changes and enhancements as well as bug fixes for the platform. An overview of these enhancements is included in this document as are highlights of various bug fixes.

NEW FEATURES IN THIS RELEASE

ACCOUNT INFO

The user profile will now have an Account Info tab which will allow users to edit the following:

- First Name
- Last Name
- Display Name
- User Name

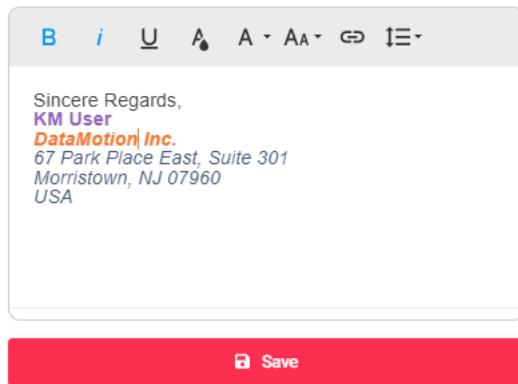

Once a user has edited their desired fields, they must click the Save button.

The screenshot shows the 'Account Info' tab selected in a user profile interface. At the top, there is a profile card with a blue circular avatar containing the letter 'K', the email address 'kevinm@datamotion.com', a pink link 'kevinm@datamotion.com', and the text 'Member Since Jul 26, 2024'. Below the card are two tabs: 'Account Info' (active) and 'Account Statistics'. The 'Account Info' tab contains four input fields: 'User Name', 'Display Name' (with the value 'kevinm@datamotion.com'), 'First Name', and 'Last Name'. At the bottom of the form is a blue 'Save' button with a floppy disk icon.

Message Signature

The new Account Info area of the user profile also contains a new message signature option that users can use in all of their messages. Creating a signature simply requires opening the user profile (the user profile now defaults to Account Info which is where the signature option is). An example signature using a variety of options is shown below:

Signature

Signature editor interface showing a signature template and a Save button.

Signature template text:

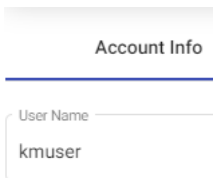

Sincere Regards,
KM User
DataMotion Inc.
 67 Park Place East, Suite 301
 Morristown, NJ 07960
 USA

Save button: Save

Always ensure to click the Save button when creating or editing a signature.

UserID Support

Within the new Account Info area of the user profile, a User Name field has been added to provide support for login via a UserID. This is a simple process and simply requires entering a desired name or id into the User Name field as shown below.

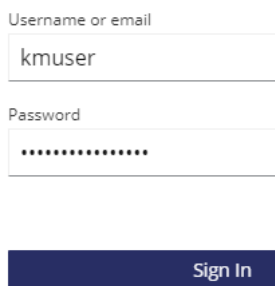

Account Info

User Name

kmuser

Once you enter the desired name/id simply click the Save button on the Account Info tab. Now when you login to the platform from the Login screen you can enter the User Name as part of your credentials and then click Sign In to access the secure message center. An example is below:

Log In

Log In form showing Username or email and Password fields, and a Sign In button.

Username or email

kmuser

Password

.....

Sign In

SECURE FORMS

This release includes a completely new product line within the platform in Secure Forms and an accompanying set of features. Additional information for this new product shall be provided at a later date.

SUB COMPANY SUPPORT

Sub company support functionality has been added in this release. This functionality allows our customers to introduce multiple child or sub companies under their tenant. This feature set allows for:

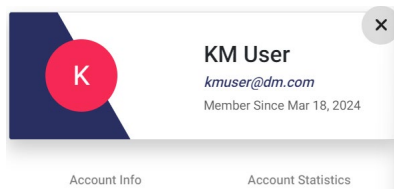

- Custom account types & rules
- Custom domains & branding for sub companies
- Common reporting across tenant

This functionality requires the assistance of the DataMotion Support team so, please contact them at support@datamotion.com for assistance if you would like to implement this feature.

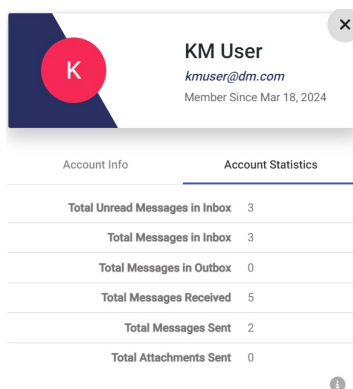

CHANGES AND ENHANCEMENTS MADE IN THIS RELEASE

USER PROFILE

The user profile area of the message center has been updated to contain both account statistics and account information. Within the user profile you will notice that there are now two tabs, one for accessing Account Info (left tab) and one for accessing Account Statistics (right tab). This will look something like the following:

Account Info is now the default tab that will be displayed, and Account Statistics can be reached by clicking the corresponding tab.

Account Info First and Last Name

The First Name and Last Name fields for the user profile can contain 100 characters.

NOTE: This also applies to any First Name and Last Name fields in the administrative settings as well.

RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this is a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

Table 1. Resolved Issues

Original Issue	Description/Resolution	Notes
Sometimes in line images from Microsoft Outlook Messages would be broken.	A configuration issue within the system was causing inline images to not render in a user's inbox within the secure message center. This has been corrected and inline images will now render.	Resolves issue from Ticket#10226483.
The Account list would sometimes show both Active and Deleted Accounts.	At times even with the Account List filtered to show either Active or Deleted, the filter would still show both types of accounts. This has been corrected and the filter will work as expected.	Affects the administrative settings in the secure portal.
First and Last Name would not accept numbers on account creation.	Numbers could not be entered into the First Name or Last Name fields when accounts were created. This has been corrected	Affected account creation.
