INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.10. This release is a culmination of changes and enhancements as well as bug fixes for the platform. An overview of these enhancements is included in this document as are highlights of various bug fixes.

NEW FEATURES IN THIS RELEASE

ADDING USERNAME TO MESSAGES VIA CUSTOM MAILBOX

NOTE: For this release if you desire to utilize this feature you will need to contact DataMotion Support for assistance with configuration.

It is now possible to have a user's User Name be included in any message that is sent or received on the platform via Plain Text Delivery. This requires a company to have a couple of new settings configured which include:

- Custom Mailbox – This is a toggleable setting:

Custom Mailbox

- Custom Mailbox Domain – A text field for entering your desired domain.

Custom Mailbox Domain

NOTE: The Custom Mailbox Domain will have the text “dmid” added to your domain to the left of your input. Do not enter the text “dmid” itself into the field as it will be automatically added.

When sending messages via Plain Text Delivery the format of the From address with this feature is as follows:

```
"{displayName}" {userName}@dmid.yourdomain.com
```

A practical example of this would be:

```
"John Doe" <john@dmid.company.com>
```

In order to address a user by their username when sending a message to them (this would be the To field when creating a message) using this feature, the format would be as follows:

```
"{displayName}@{emailAddress}" {userName}@dmid.yourdomain.com
```

A practical example of this would look like:

```
"John Doe@john@company.com" <johndoeusername@dmid.yourdomain.com>
```

NOTE: A mail rule will have to be entered into your email server (such as Microsoft Exchange) to appropriately process messages with one of these Custom Mailbox Domains.

CUSTOM NON-DELIVERY RECEIPT (NDR)

Custom NDRs are now possible (if using the above Custom Mailbox settings). These can be created as .html and .txt style notifications in the format of Ndr.html and Ndr.txt.

NOTE: DataMotion Support will be needed in order to add the templates. Please contact them at support@datamotion.com for assistance.

CHANGES AND ENHANCEMENTS MADE IN THIS RELEASE

PASSWORD RESTRICTIONS

Any passwords entered during account creation that are a part of the platform's password blacklist will now return an error to the user if they enter a blacklisted password.

RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this is a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

Table 1. Resolved Issues

Original Issue	Description/Resolution	Notes
The Message Count and Login Count reports were not respecting daylight savings time.	These specific reports had corrections made in order to properly respect timezones with daylight savings.	Affected report generation within the portal for administrators.
At times the Account Type settings would require a refresh when adding a new Account Type card.	This has been corrected and no refresh should be required upon Account Type creation.	Affects the Account Types area of the administrative settings within the platform..
An improper error message would display when updating First Name or Last Name.	This would occur when attempting to edit a First or Last Name with more than 255 characters. This has been corrected and an appropriate message will be displayed.	Affected account edits within the administrative settings on the platform.
