INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.15. This release is a culmination of changes and enhancements as well as bug fixes for the platform. An overview of these enhancements is included in this document as are highlights of various bug fixes.

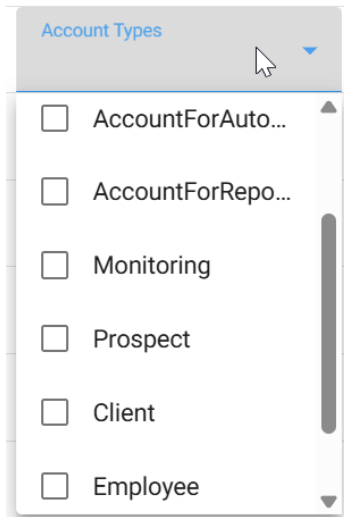

CHANGES AND ENHANCEMENTS IN THIS RELEASE

SETTING SECURE FORMS TO BE VISIBLE FOR CERTAIN ACCOUNT TYPES TO USE WITH THE COMPOSE BUTTON

This release includes the capability to designate created Secure Forms to be seen by certain user types when they are on the SMC web portal interface. When a Secure Form is created and while an admin is on the Form Library view there will be a new Account Types column that will allow admins to set what Account Types are able to see which forms under the Compose button.

Form Name	Date Saved	Account Types
 Test Form	6/6/25, 10:53 PM	Account Types ▼
 Shaun Test - Employee Onboarding Form	6/6/25, 10:39 PM	Account Types Client ▼
 Copy of Retirement Distribution Request Form	5/29/25, 7:13 PM	Account Types FormOnlyUser ▼
 Retirement Distribution Request Form	5/29/25, 7:12 PM	Account Types ▼
 Member Contact Form	5/29/25, 4:15 PM	Account Types Admin ▼
 form rules	5/19/25, 7:33 AM	Account Types ▼
 Simple Information Form	5/13/25, 9:09 AM	Account Types ▼

Selecting a form's Account Types drop-down will show all available Account Types within the organization and allow admins to select one or multiple Account Types to be able to see the Secure Form under the Compose button.

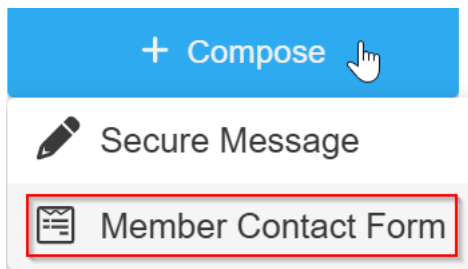

Account TypesA screenshot of a web interface showing a dropdown menu titled "Account Types". The menu is open, displaying a list of account types with checkboxes next to them: "AccountForAuto...", "AccountForRepo...", "Monitoring", "Prospect", "Client", and "Employee". A mouse cursor is pointing at the dropdown arrow.

Once an Account Type(s) has been selected the users within that Account Type will be able to access the Secure Form in question via the Compose button from the standard SMC web portal.

Accessing a Secure Form via the Compose Button

Users who's Account Types are selected for a Secure Form can easily access the form to fill one out in the same manner as if they were going to create a secure message. They can do this at any time by simply clicking the Compose button which show all of the Secure Forms that they are able to access and fill out.

NOTE: The icon  means the option being chosen is a Secure Form.

A screenshot of a web interface showing a blue button labeled "+ Compose" with a hand cursor icon. Below the button is a dropdown menu with two options: "Secure Message" (with a pencil icon) and "Member Contact Form" (with a document icon and a red border around it).

Once the Secure Form has been selected the user can fill out this form in the same manner as they would any other Secure Form that might be embedded into your own website or given out in link form.

COMPANY ADMINISTRATION SETTINGS FILTER

This release has improved the company admin settings views to allow administrators to filter specific settings so they can easily locate the exact options they are looking for. Any user with administrative privileges is able to do this via the web interface by simply accessing the admin settings area and using the **Filter Settings** search bar at the top.

When a setting is searched for it will look something like this:

Session

Message Center Company Settings

Description	Value
Session inactivity limit in minutes	38

As there is only one setting with the word Session, all other settings are hidden from view and only the appropriate option is displayed for the admin.

To return to the regular view simply delete what was typed into the **Filter Settings** search bar.

COMPOSE BUTTON LABEL SETTING

This release has improved the company admin settings to allow administrators to change the appearance of the Compose button that appears when creating a message via the web portal of SMC. This setting can be found amongst all other admin settings and will look like this:

Label to use on Compose Button

Compose

When changing the setting from its default (Compose) the change will reflect for all users creating messages.

DEMO SETTING

This release has improved the company settings area for administrators in that it is now possible to disable/enable easy access to the embed demonstration page. This setting is with all other settings in the admin area.

Show Embed Demo Page

When set to disabled the button for Demo will disappear from the user drop down.

LIST VIEW FRIENDLY DATES

When viewing information such as track sent or inbox messages, the date columns will now appear as today, yesterday, etc. depending on when they were sent or received. For example, the Created column in the Sent folder would now look like this:

Created

Today
1:31 PM

RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this is a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

Table 1. Resolved Issues

Original Issue	Description/Resolution	Notes
Sometimes users will be asked to sign in twice when utilizing Microsoft as their Single Sign On option.	This has been corrected and any logins using Microsoft for SSO should now only need to be performed once.	Affected SSO sign in on the SMC web portal.
Embedded images would not appropriately display in Gmail.	When sending messages with embedded images to users who utilize Gmail, at times the images would not display properly or at all. This has been corrected and embedded images should now display in Gmail without issue.	Affected sending messages to Gmail. Also affected sending messages into Genesys.
Adding images via link would not work on the Compose screen.	When composing messages and attempting to add an image using the image icon and adding an image link, no image would be added. This has been corrected and should no longer occur.	Affected composing messages via the SMC web portal.
Adding attachments into the text area created broken links.	When dragging an attachment directly into the text editor on the compose screen broken links would be put in. This has been corrected and should no longer occur.	Affected composing messages via the SMC web portal.

KNOWN ISSUES

The following table includes known issues discovered but not resolved as of this release.

Issue
When changing a user's username, there is no warning given to the user and they are logged out.
In the Account Type Settings Report some Previous Value fields are not displayed when after changing a setting.
