INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.15.1. This is a minor release which simply includes bug fixes for the platform. An overview of these fixes is included in this document.

RESOLVED ISSUES

The following-reported issues have been resolved in this release.

Table 1. Resolved Issues

Original Issue	Description/Resolution	Notes
Sometimes no forms would be shown when using the compose button to access and fill out a form.	When on the mobile format of the SMC web portal, users would not be able to select forms when using the Compose button or only be sent to a single form without any other options being available. This has been corrected and should no longer occur.	Affected the compose button drop-down for forms on the SMC web portal.
When embedding forms, at times anonymous submissions would occur when it was not expected.	When the tenant variable was missing the token would not always connect the user submitting the form and sometimes lead to anonymous submissions. Additonal logic was added to properly match tokens to tenants even if the tenant variable is missing to correct the issue.	Affected the submission of forms that use the embedded method.

KNOWN ISSUES

The following table includes known issues discovered but not resolved as of this release.

Issue
When changing a user's username, there is no warning given to the user and they are logged out.
In the Account Type Settings Report some Previous Value fields are not displayed when after changing a setting.
