INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.18. This release is a culmination of bug fixes for the platform as this is mostly a maintenance release.

RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this is a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

Table 1. Resolved Issues

Original Issue	Description/Resolution	Notes
Certain tooltips in the secure forms interface were not working as expected.	The datepicker and checkbox's tooltips were not displaying correctly when hovered over within the secure forms editor. This has been corrected and should no longer occur.	Affected secure forms creation for admins on the secure platform's web portal.
The profile icon would sometimes not display properly.	When using the Feed view on the Secure Message Center, the profile icon for the logged in user would not display properly within the interface. This has been corrected and should no longer occur.	Affected users on the Secure Message Center using the Feed view.
Mobile users would sometimes see a Compose button when they should not have seen one.	When using the Secure Message Center on a mobile device, some users were able to see the Compose button even though they had no message compose setting for their account. This button did not do anything but was a visual error. This has been corrected and should no longer occur.	Affected users on the Secure Message Center using a mobile device.

KNOWN ISSUES

The following table includes known issues discovered but not resolved as of this release.

Issue
When changing a user's username, there is no warning given to the user and they are logged out.
In the Account Type Settings Report some Previous Value fields are not displayed when after changing a setting.
