## INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.20. This release is a culmination of bug fixes and enhancements for the platform in this release. General updates and platform improvements have also been performed for maintenance purposes to enhance the overall user experience.

## NEW FEATURES IN THIS RELEASE

### MULTI-FACTOR AUTHENTICATION

This release includes the option to utilize multi-factor authentication when logging into the Secure Platform via the standard username and password login mechanism. When using this feature and logging into the platform using the standard username and password method you will be greeted with something like this:

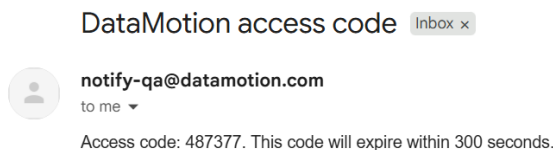

#### SECURE MESSAGE CENTER

There are two options currently available that being Email or an Authenticator app via Setup Authenticator.

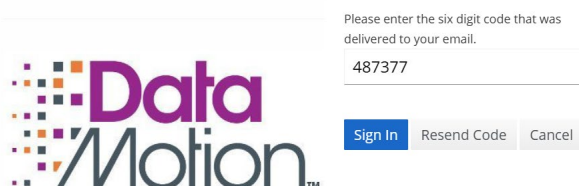

**NOTE: If you decide to use the Setup Authenticator method, you will still need to use an Email code at least once.**

When selecting Email, you will receive a six-digit code at your account's registered email address which should look something like this:

Enter the code from the email you received into the Sign In area as shown below.

#### SECURE MESSAGE CENTER

If you selected only the Email option you will be signed into your account and this setup will be complete.

If you chose the Setup Authenticator option continue reading and perform the setup steps below.

**NOTE: At this time the options available for Authenticator apps to utilize for signing into the Secure Platform include:**

- Microsoft Authenticator
- Google Authenticator
- FreeOTP

Choose an authenticator application and utilize the QR code to begin the setup process for your chosen application.

## SECURE MESSAGE CENTER

### Mobile Authenticator Setup

**⚠ You need to set up Mobile Authenticator to activate your account.**

1. Install one of the following applications on your mobile:

Microsoft Authenticator  
Google Authenticator  
FreeOTP

2. Open the application and scan the barcode:

[Unable to scan?](#)

3. Enter the one-time code provided by the application and click Submit to finish the setup.

Provide a Device Name to help you manage your OTP devices.

One-time code \*

Device Name

☐ Sign out from other devices

Submit

Retrieve the six digit code from your application and enter it into the One-time code area.

You can optionally enter a Device Name for easier reference. This is recommended especially if you intend to use multiple devices.

## SECURE MESSAGE CENTER

### Mobile Authenticator Setup

**⚠ You need to set up Mobile Authenticator to activate your account.**

1. Install one of the following applications on your mobile:

Microsoft Authenticator  
Google Authenticator  
FreeOTP

2. Open the application and scan the barcode:

[Unable to scan?](#)

Provide a Device Name to help you manage your OTP devices.

One-time code \*

881150

Device Name

Pixel 9 Pro

☒ Sign out from other devices

Submit

Click Submit to finish setup and sign into your account.

## CHANGES AND ENHANCEMENTS IN THIS RELEASE

### SECURITY IMPROVEMENTS

Numerous overall security improvements have been made as part of the secure platform's standard development and DataMotion's continuous security improvements efforts.

### ACCESSIBILITY IMPROVEMENTS

As of this release extensive accessibility improvements have been implemented to enhance the Secure Platform to be up to date WCAG standards and to meet compliance with numerous accessibility regulations.

## RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this is a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

**Table 1. Resolved Issues**

| Original Issue                                 | Description/Resolution                                                                                            | Notes                                                                     |
|------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| The web portal's CSP was showing known issues. | Updates to the CSP on the web portal of the Secure Platform have been made to ensure there are no further issues. | Affected the web portal of the Secure Platform. Addresses Ticket#10236550 |

## KNOWN ISSUES

The following table includes known issues discovered but not resolved as of this release.

| Issue                                                                                                           |
|-----------------------------------------------------------------------------------------------------------------|
| When changing a user's username, there is no warning given to the user and they are logged out.                 |
| In the Account Type Settings Report some Previous Value fields are not displayed when after changing a setting. |
