INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.24. This release is a culmination of bug fixes and enhancements for the platform in this release. General updates and platform improvements have also been performed for maintenance purposes to enhance the overall user experience.

CHANGES AND ENHANCEMENTS IN THIS RELEASE

LOW CODE WIDGET COMPONENT LOADING

This release includes a new capability for the low code widget which will allow admins to specify which component of the Secure Message Center (such as the Inbox or Compose screen) users will be loaded into upon access.

LOW CODE WIDGET SPECIFYING URLS

This release also includes the capability for admins to specify specific URLs for message notifications that contain links.

COMPOSE ENHANCEMENTS

This release has improved the Compose message page of the Secure Message Center to better highlight suggested recipients when creating a message.

RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this is a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

Table 1. Resolved Issues

Original Issue	Description/Resolution	Notes
Admin setting filters would sometimes reset.	At times when changing a setting for an Account Type and an admin was filtering the administrative settings the filter would be lost upon auto save. This has been corrected and should no longer occur.	Affected admins on the Secure Message Center web portal.
Authentication would sometimes have issues if an account had multiple emails.	At times if an account was found to have a unique username but the same email address was being for multiple accounts then authentication would not work as expected. This has been corrected and should no longer occur.	Affected authentication for users on the Secure Platform.
Account switching would sometimes not work as expected.	In situations where users would have access to multiple mailboxes the capability would sometimes have issues on first use. This has been corrected and should no longer occur.	Affected any users utilizing group mailbox functionality on the Secure Platform.

KNOWN ISSUES

The following table includes known issues discovered but not resolved as of this release.

Table 2. Known Issues

Issue
When changing a user's username, there is no warning given to the user and they are logged out.
In the Account Type Settings Report some Previous Value fields are not displayed when after changing a setting.
