INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.25. This release is a culmination of bug fixes and enhancements for the platform in this release. General updates and platform improvements have also been performed for maintenance purposes to enhance the overall user experience.

CHANGES AND ENHANCEMENTS IN THIS RELEASE

SHARED ACCOUNTS

For users who have shared account functionality enabled it will now be possible to see the total unread messages of all accounts shared with a user. This will be a simple numeric bubble above the shared user icon and look something like this:

NOTE: The capability to switch accounts has also been moved under this shared user icon and simply requires clicking on the shared user icon and then selecting the desired user to switch into.

NOTE: For customers that might have multiple tenants it is now possible to perform account switching between accounts in different tenants as well if desired.

SECURE PLATFORM API

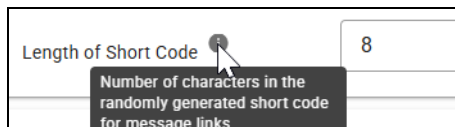

The APIs within the Secure Platform have been updated to remove redundant fields across functions to enable easier use of the API. For example, a read property within the Send Message function has been removed as it was not necessary for the function.

PUBLIC

Public Release Authorized

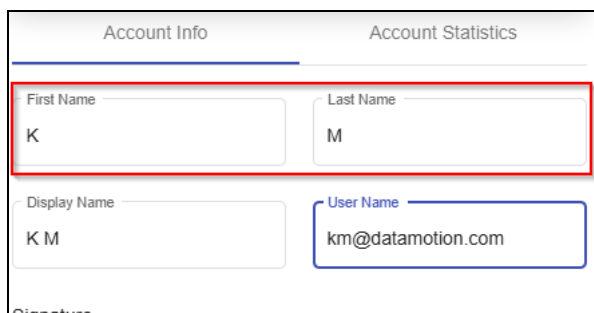

NOTIFICATION SHORT CODE LENGTH

This release has added a way to configure the length of the short code present in message notifications sent to users. The setting is only configurable by administrators within the Message Center Company Settings area. This can be set anywhere between 8 and 32 characters if desired.

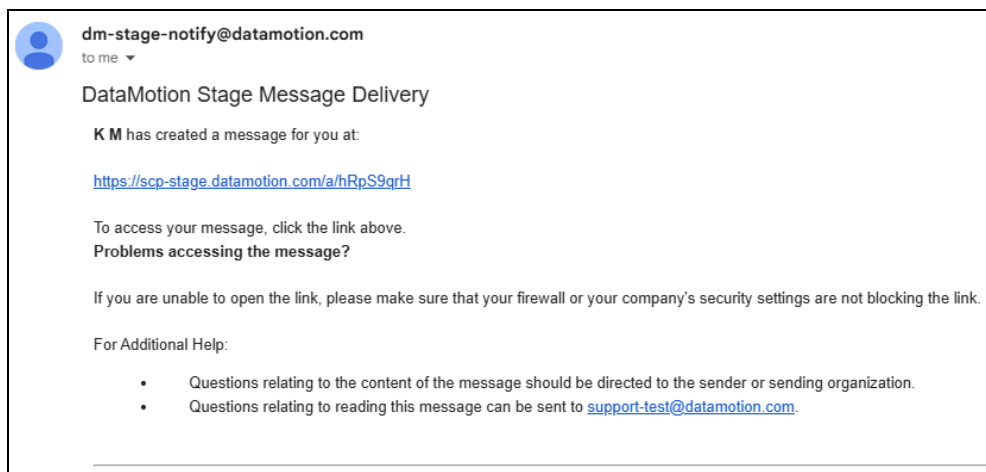

NOTIFICATION DISPLAY

This release will now show the First Name and Last Name of a user in the message notifications that are sent out recipients. For clarification, this would be whatever is contained in the First Name and Last Name of the Account Info tab like the below:

These values will be what appears in all message notifications going forwards and look like the below:

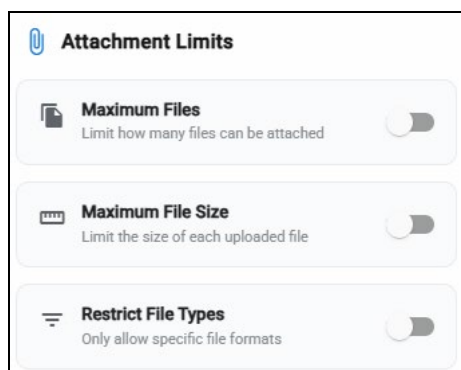

PUBLIC

SECURE FORMS ENHANCEMENTS

This release will allow creators of Secure Forms on the platform to set limits on the number of attachments that can be included when using the File Upload component of the forms editor. These new settings are under the **Attachment Limits** section of the File Upload component's settings and can be enabled individually. These include the following:

NOTE: By default, they will be in the disabled state and appear like the below.

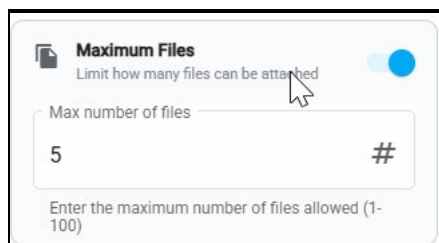

Attachment Limits

- Maximum Files**
Limit how many files can be attached
- Maximum File Size**
Limit the size of each uploaded file
- Restrict File Types**
Only allow specific file formats

- **Maximum Files**

- » Sets the maximum number of files that can be uploaded to the File Upload component. This can be up to 100 files.

Maximum Files
Limit how many files can be attached

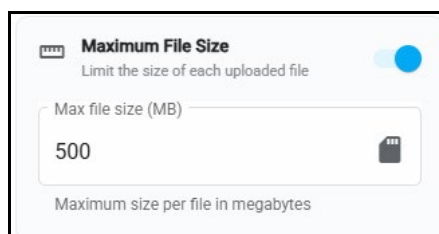

Max number of files

5 #

Enter the maximum number of files allowed (1-100)

- **Maximum File Size**

- » Sets the maximum file size that an attachment can be when uploaded. This can be a maximum of 500 megabytes.

Maximum File Size
Limit the size of each uploaded file

Max file size (MB)

500

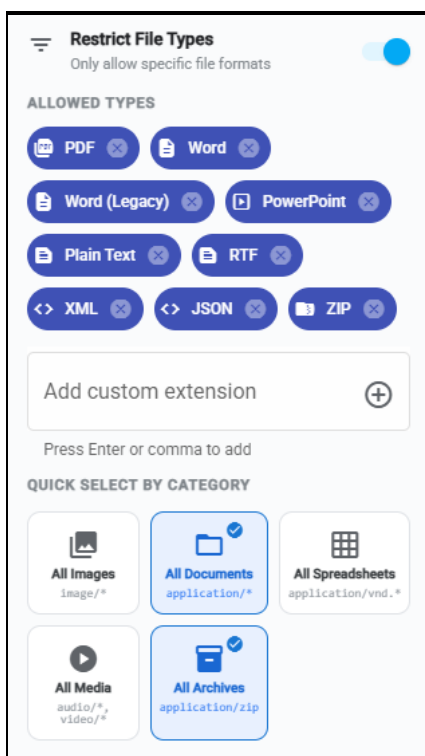

Maximum size per file in megabytes

PUBLIC

- » Custom file extensions can also be added to the list by using the Add custom extension area and entering a valid file type.

- » Simply click the plus symbol and the custom file type will be added to the allowed list.

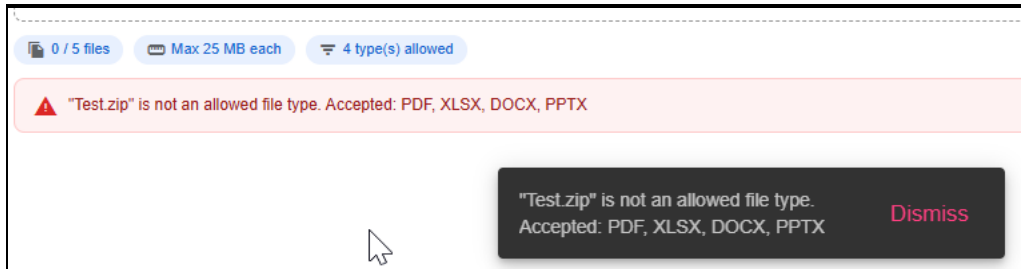

- » When you are satisfied with the restrictions, they will appear in the File Upload component when a user fills out the form like the below:

PUBLIC

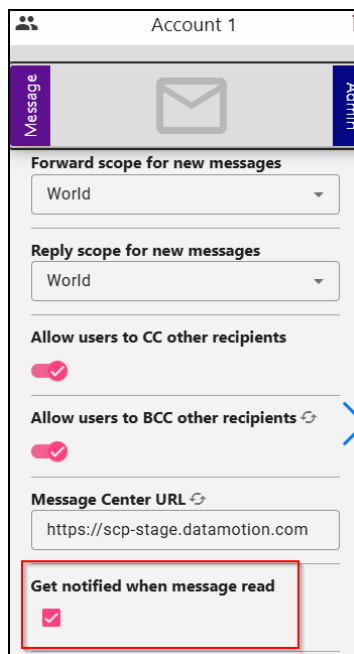

Public Release Authorized

NOTE: If a user does attempt to upload a file type that is not permitted, they will receive an error message and a notification instructing them that the file type is not allowed.

READ RECEIPT NOTIFICATIONS

This release has introduced an additional Account Type setting that can be configured by administrators which allows them to disable read receipt notifications for users within an Account Type. The setting is a checkbox specifically called **Get notified when message read** and looks like the below:

When the checkbox is set to an unchecked state users within the Account Type will no longer receive read receipt notifications.

RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this is a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

Table 1. Resolved Issues

Original Issue	Description/Resolution	Notes
Notifications would sometimes not display the appropriate language	When setting a browser to French-Canadian and loading the web portal or widget the display would be in the appropriate language. However, the message notifications sent would be shown in English which was not expected. This has been corrected and should no longer occur.	Affects users of the Secure Platform web portal and widget users that use the French-Canadian language.
Search would sometimes not display consistent results.	Searching for users and email addresses would sometimes lead to inconsistent message results on the Secure Platform web portal depending on the environment. This has been corrected and should no longer occur.	Affects users of the Secure Platform web portal.
Incorrect error messages were sometimes displayed in Secure Forms.	When the default anonymous sender for forms was not set in the company settings there would be an incorrect error message displayed to users. This has been corrected and should no longer occur	Affects users of the Secure Platform who create secure forms.
