INTRODUCTION

This release note provides information about the DataMotion SCP Release 7.28.1. This release is a culmination of fixes and general improvements for the platform as this is primarily a maintenance release.

CHANGES AND ENHANCEMENTS IN THIS RELEASE

SECURE MESSAGE CENTER ACTION MENU

This release includes a simple addition to the platform's Secure Message Center which allows users to move a message from the action menu of the read message view and this menu will now include the Move option as shown below:

-  User Profile
-  Tracking Information
-  Download PDF
-  Reply All
-  Forward
-  Move
-  Delete

RESOLVED ISSUES

The following-reported issues have been resolved in this release. If this is a Maintenance Release, the most recent Maintenance Release is listed first. (Note that some Maintenance Releases may not be listed because they do not always require documentation).

Table 1. Resolved Issues

Original Issue	Description/Resolution	Notes
Undo was not working properly for messages that were not permanently deleted.	In some cases users were unable to undo the deletion of a message even though the intention was not to permanently delete the message. This has been corrected and the Undo function should work as expected.	Affects users of the platform within the Secure Message Center web portal.
Updating a user profile would prompt a success message in unnecessary cases.	When a user would save their user profile a profile saved successfully message would pop-up even if nothing was edited. This was changed as it was misleading to the user if they made no changes.	Affects users of the platform within the Secure Message Center web portal.
At times updating a form's content was not successful.	When editing a secure form in the editor the rich content component was not able to be edited in certain situations. This has been corrected and should no longer occur.	Affects secure forms admins who edit or create forms within the platform.

KNOWN ISSUES

The following table includes known issues discovered but not resolved as of this release.

Table 2. Known Issues

Issue
When changing a user's username, there is no warning given to the user and they are logged out.
In the Account Type Settings Report some Previous Value fields are not displayed when after changing a setting.
